Deconfliction

Deconfliction is a process that allows law enforcement agents to determine if an event, or target of an investigation is currently being or has been investigated by another law enforcement agency. Law enforcement agencies can ascertain if there is another agency with a common interest in the event or target.

Secure Automated Fast Event Tracking Network (SAFETNet) is an on-line application, hosted by *EPIC*, that provides deconfliction with geo-tagging ability via the EPIC Portal. SAFETNet is only available to personnel in participating HIDTA's.

Events

Events are places and locations set in time. Events can be associated with subjects but are time specific.

Target

Target refers to an individual or entity that is the subject of a criminal investigation. Target categories provided in SAFETNet include:

- Event
- Persons
- Address
- Vehicle
- Phone
- Business
- Weapon
- Internet
- Account

Participating HDTAS

The HIDTA regions currently participating in SAFETNet include:

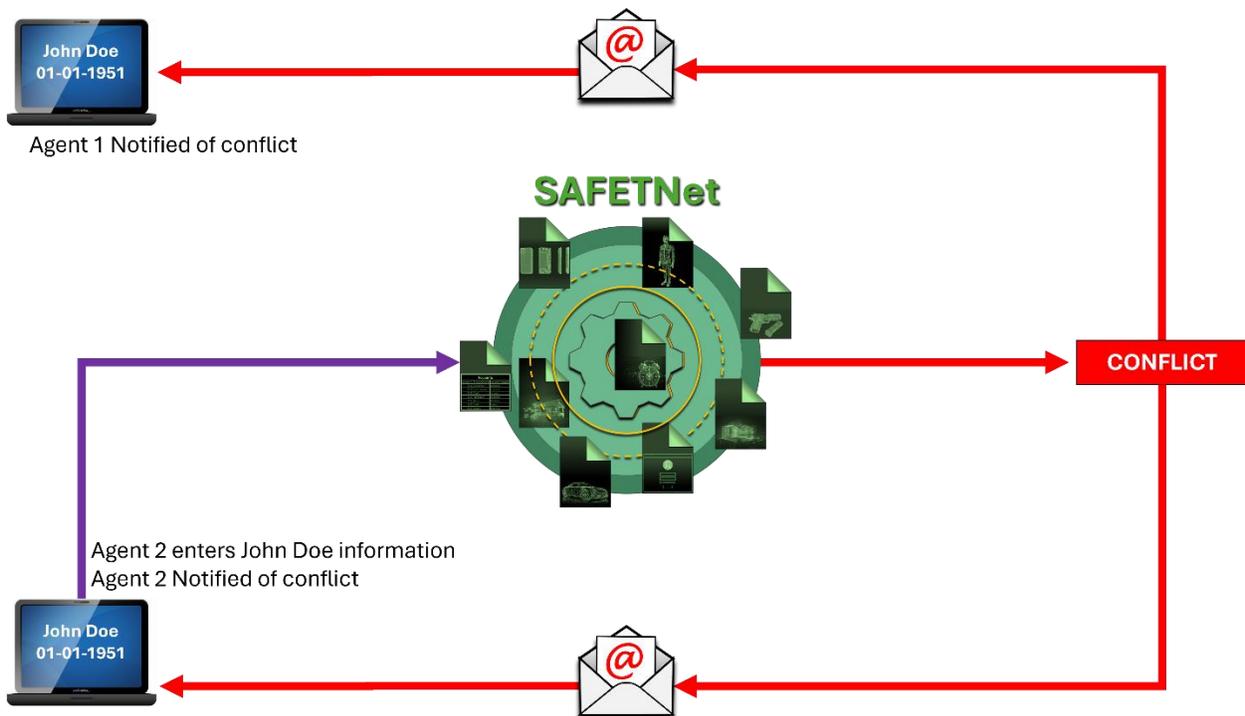

- Atlanta
- Chicago
- Gulf Coast
- Midwest
- New England
- South Texas
- Puerto Rico

Deconfliction Through SAFETNet

When SAFETNet detects an event conflict between two or more agencies, the agents are notified by email with their respective contact information only. Below illustrates when an Agent enters their target information and there are no conflicts found.

Below illustrates when an Agent enters their target information and a conflict is found. SAFETNet will notify the original Agent who entered the entity information as well as the Agent that has just duplicated the entity information.

These notifications provide contact information so the Agents can communicate to verify if there is a conflict. This communication can also help both Agents provide more information to each other regarding the common entity.

VCC

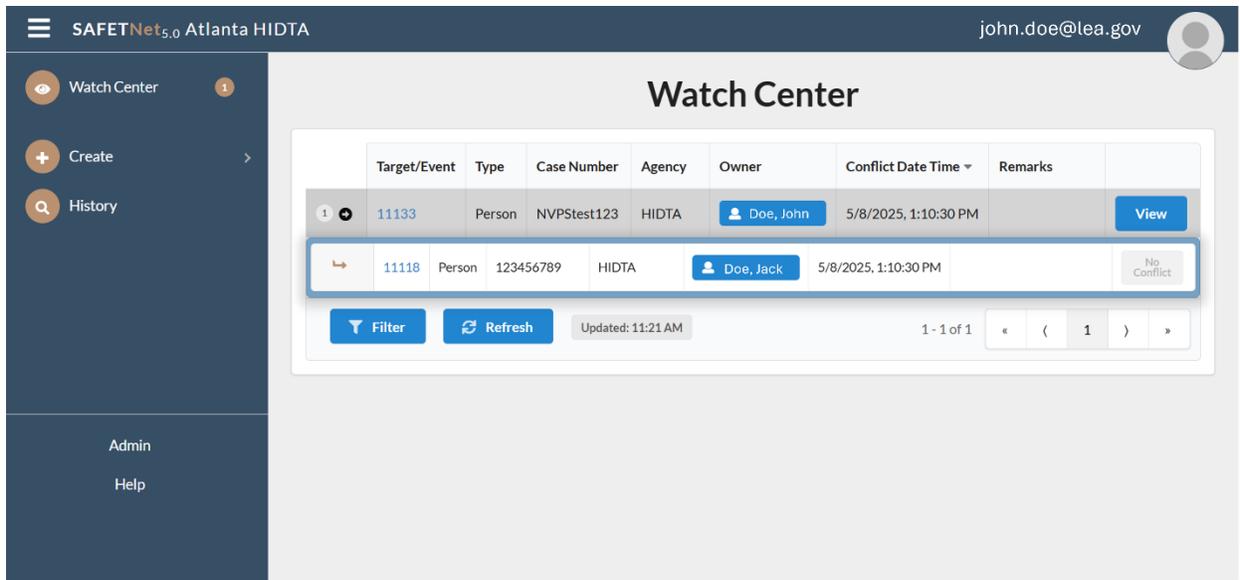

Fountainhead

After the application launches, there are three main options that are available: *Watch Center*, *Create* and *History*.

Watch Center

The Watch Center page will list current conflicts. In the above example, there is a conflict with the Date and Time related to the target date and time for this event. To view a conflict, click on the **arrow to the left of the Target/Event number**. Note: the number to the left of the arrow indicates the number of conflicts found with the target.

Both events will display to review. In the example, the conflict was resolved and displays **No Conflict** to indicate it has been mitigated.

View

Use the View option to show what target was flagged as being in conflict. Use the arrow to the left of the Person ID to open this target information.

You can now compare the two targets and resolve the conflict if needed.

Agency

Filter provides several options to allow you to view records by Deconfliction, Target/Event, Case Number, Case Type, Date Range, Owner of the Entity and Agency. You can use one or more fields for the search to review related Entities that have been entered.

Create

The Create tab provides nine categories for deconfliction: *Event, Person, Address, Vehicle, Phone, Business, Weapon, Internet* and *Account*.

Create Event

All field with a red asterisk (*) are required.

Owner Information

User search

User Search is used to assign the POC for this deconfliction. Enter the last name for the POC of this event and then click **Search**. To help narrow down results, Agency and Agency Command can also be entered.

A list of SAFETNet users with the same last name will display; select the POC for this deconfliction and then click **Confirm**.

Case Number, Event Type, Start Date/Time and End Date/Time

After the POC has been confirmed, enter the Case Number, select the Even Type and then the Start and End Date and Times. *Note: Event Radius is pre-set to 0.5 miles to search for a duplicate address, which will be entered next, and event date and time.*

*Case Number		
99101		
*Event Type		
Surveillance		
*Start Date	*Start Time	Event Duration
07/18/2025	09 : 00 AM	4 Hours
*End Date	*End Time	Event Radius
07/18/2025	01 : 00 PM	0.5

Search Location

Next, we need to establish the location for the deconfliction event. Click on *Search Location*. Enter the *Street Address, City, State* and *Zip Code* then click **Search**.

Address or Lat/Lon	
1740 Lions Club Rd	
Intersection	
City

Address Search

Search Address

To add an address, click on Search Address to launch the form required.

The US map will display and in the upper right, the fields needed to enter your location. Once you have entered the location, click on **Search**. The map Geocode will provide what can be found based on information provided. *There is a half mile radius around the location also included to ensure your address has been found.* Select the desired address and then click **Save Location**. If none of the results are what you are looking for, you can click **Nevermind** to start over.

You will be returned to the main form to review all the information.

If everything looks good, and there are no edits, click **Submit**. If updates are needed, you have the **Update** option as well as **Cancel Address** if this is no longer needed or a duplication has been made.

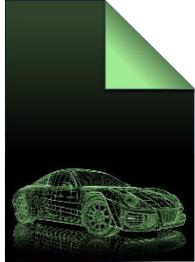

In addition to the above, you will receive an Email informing you that the Address was added successfully and you are the Owner of this record.

Resolve Conflict

There is the **Resolve Conflicts** button you can click to review what has been found.

The screenshot shows the SAFETNet Atlanta HIDTA interface. A notification at the top right says "Person Created" with a green checkmark and a "Resolve Conflicts" button. Below this, a red banner states "You have 1 pending conflict! Please review and resolve conflicts." The main content is a "Person Summary" card for ID 11138, displaying various fields such as Case Number, Status, Last Name, First Name, Middle Name, Suffix, Maternal Surname, Gender, Race, Age, Date of Birth, SSN, Gang Affiliation, Moniker, Expiration Date, Remarks, Creator, Creator Phone, Creator Email, and Created Date.

Duplicate Target By Same User

Cancel Person

Below example is an example where the Person entity has been entered twice. If this has happened, you can click on **Cancel Person** to delete the duplicate.

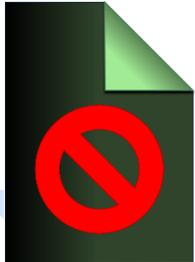

The screenshot shows the "Person Conflicts" section in the SAFETNet Atlanta HIDTA interface. It displays two entries for a person named "tester Test". The first entry has ID 11138 and is marked as "Cared Conflict". The second entry has ID 11137 and is marked as "Pending Conflicts". Both entries are associated with the "Drug Enforcement Administration (DEA)" and have a status of "ACTIVE". The "Cancel Person" button for the second entry is highlighted with a red box.

An alert pop-up will appear to allow you to continue with the duplicate deletion or use the **Nevermind** option to keep this entity instead.

The screenshot shows a "Cancel Person" dialog box. It asks "Are you sure you want to cancel this Person?" and displays the following details for Person ID 11137: Last Name: Test, First Name: tester, Middle Name: [not provided], Suffix: [not provided], Maternal Surname: [not provided], Case Number: 99103, Gender: Male, Race: [not provided], Age: 35. At the bottom, there are two buttons: "Nevermind" and "Cancel Person".

Resolve

The other option is to **Resolve** the conflict. A Pop-up will allow you to confirm this is a **Conflict**, **No Conflict** or **Ignore** this entity.
